

SARAH BECHEL

Senior Director of AI & Digital Transformation

sarah.bechel@naturallylogical.com ♦ Amesbury, MA ♦ (512) 884-1220 ♦ NaturallyLogical.com

Executive Summary

I build AI and automation programs that deliver real business results, not just working prototypes. Over the past several years I have owned AI strategy, led cross-functional transformation programs, and designed enterprise systems across SaaS, healthcare, energy, and manufacturing. My work spans the full range from setting the roadmap to getting it live, and I have a consistent record of reducing operational cost, accelerating cycle times, and leaving teams with systems they can actually own and scale.

Core Competencies

- AI Strategy & Roadmap Development
- Enterprise Integration Architecture (Salesforce, NetSuite, Oracle, Workato, Boomi, Mulesoft)
- Digital Transformation Program Leadership
- Cross-Functional Team Leadership and Governance
- Automation Design: Process Engineering, Exception Handling, Decision Logic
- Data Modeling, BI, and Analytics (Snowflake, Looker, Power BI, Tableau, Redshift)
- AI Readiness Assessment and Phased Implementation Planning
- Stakeholder Communication and Executive Reporting

Career Highlights

- Architected Tebra's first enterprise AI roadmap, integrating Salesforce, Workato, and chatbot automation. Reduced support case volume by 20% and generated \$1M in annual cost savings.
- Designed and deployed a multi-phase AI Agent Framework covering automation, contract reconciliation, and financial reporting. Published as an open framework to accelerate AI adoption across teams.
- Directed cross-functional automation initiatives across Finance, Operations, and Sales for 17K+ customers, compressing cycle times by up to 80%.
- Built an AI-powered supplier performance scorecard system for a global enterprise client, replacing fragmented Excel and email processes with a governed Airtable workflow covering scoring, approvals, reminders, and executive dashboards.
- Delivered \$700K in operational cost savings at WETT through process automation, vendor workflow redesign, and SCADA/RTAC system improvements.
- Consolidated a five-person manual invoicing team at SHI into a single automated workflow, shifting the team's focus entirely from data entry to data integrity.

Professional Experience

NATURALLY LOGICAL LLC – Principal Consultant, AI & Digital Transformation

May 2025 to Present

Independent Consulting Practice — Remote

- Lead enterprise-level integration and automation engagements for clients in energy, procurement, and operations sectors.
- Designed a governed supplier performance scorecard program for a global enterprise client, architecting the full workflow in Airtable including automated evaluator communication, weighted scoring, approval routing, and stakeholder reporting.
- Built an AI-driven procedure extraction pipeline using DACUM methodology and Airtable AI automations, with confidence scoring and SME review routing, to normalize thousands of operational tasks from oil and gas procedures.
- Deliver stakeholder documentation, process guides, and knowledge transfer so clients can maintain and evolve systems independently after engagement close.
- Advise leadership teams on AI readiness, data governance, and phased automation strategy aligned to where the organization is operationally.

TEBRA – Senior AI & Automation Engineer

July 2024 to May 2025

Remote — Newport Beach, CA

- Owned enterprise AI strategy and execution, integrating automation into customer-facing and operational processes at scale.
- Deployed the Workato GO Genie chatbot, generating 50 qualified leads in the first month and reducing support volume by 20%.
- Automated Salesforce CPQ and contract workflows, unlocking enterprise-wide data visibility and new forecasting capabilities that did not previously exist.
- Designed a customer profile system that cut research time from 15-20 minutes to under 2 minutes per interaction.

- Aligned AI and automation roadmap with executive leadership to connect technology investments to long-term business growth and data governance goals.

ALLEGRO MICROSYSTEMS – Senior Business Systems Analyst

January 2023 to January 2025

Manchester, NH

- Led KPI reporting, adoption tracking, and change management across enterprise Salesforce implementations.
- Built the company's first modular enablement content framework and reporting capabilities, giving leadership visibility that did not exist before.
- Designed a document lifecycle automation system for manufacturing operations, enabling version control and real-time updates across teams.

WETT – Operations Project Lead

July 2021 to December 2022

Austin, TX

- Delivered an estimated \$700K in cost savings through automation, vendor process redesign, and operational streamlining.
- Automated RTAC and SCADA functions, reducing downtime and operational risk across substation operations.

SHI – Operations Analyst

March 2020 to July 2021

Austin, TX

- Automated a five-person manual invoicing operation into a single workflow, improving accuracy and freeing the team for higher-value work.
- Designed Power BI dashboards and managed ETL processes to support executive decision-making.

Education

- University of Texas, McCombs School of Business — Data Analytics
- Columbia College — Math and Chemistry
- Midlands Tech — Associate Degree
